ANCILLARY SERVICES

BIDDERS/CONTRACTOR'S LEGAL NAME: Americhem International, Inc.

A Contractor may choose to offer ancillary services in conjunction with the products it provides to the Purchaser. However, any ancillary services offered must be integral to the initial acquisition, must be initiated at the time of purchase, and must be included in the scope of the original procurement. Stand-alone services are not within the scope of this supply contract.

The Bidder may choose to offer ancillary services in conjunction with the products it provides to the Purchaser. The Bidder may submit the list of ancillary services and prices it proposes to offer. If it is not possible to submit pricing, as may be the case with certain installation services, the Bidder shall simply note that it is offering the service and that the actual price will be negotiated between it and the COSTARS participant and annotated on the purchase order at time of order.

BIDDERS/CONTRACTORS LEGAL NAME Americhem International, Inc.

PRICING

The Bidder may offer any type of discount, mark-up, or other pricing structure such as multiple discounts for different lines of products, or different price lists, or different classes of Purchasers, or different prices for different quantities of products. Please reference Subsection 6.b. of the Special Terms and Conditions for further guidance.

After Contract award, a Contractor may offer, either on its own initiative or at a Purchaser's request, additional discounts, reduced mark-ups, customized lists, or discounted prices for any purchase within the scope of the Contract, even if such discounts, mark-ups, or discounted prices were not included in the bid prices.

The Bid Item Workbook should contain a separate Bid Item Sheet for each manufacturer's price list or cost sheet.

Complete Cleaning For Healthy Results

OmniFlex™ Crossover Cleaning System

Kaivac is pleased to announce the availability of the initial components of its revolutionary OmniFlex Crossover Cleaning System. The remaining components will be released over the next several months as outlined below. We believe that this new category makes advanced cleaning technology practical and accessible, expanding the market potential of Kaivac's cleaning technologies exponentially.

Click here for more information on Kaivac's website.

Drop the Mop!

Surprisingly, most of the cleaning world still relies on the antiquated traditional mop, even with all of its well-publicized shortcomings. Mopping is slow, ineffective and even potentially dangerous - leaving floors slippery, wet, and with very few of the soils and bio-pollutants removed. OmniFlex offers a variety of cost-effective alternatives to the traditional mop. And for those who still want to hold on to the past, OmniFlex offers a superior mopping system with a practical and inexpensive path forward to advanced hygienic cleaning methods when the user is ready to cross over.

Dispense-and-Vac: A Star in the Making

OmniFlex enables users to assemble multiple categories of cleaning equipment with a 'grow as you go' approach. One new category that shows tremendous promise for our distributors is the Dispense-and-Vac system. By simply combining the optional wet/dry vac with the trolley-bucket, users have a cost-effective high performance cleaning

system that is 30 times more effective at removing soils and contaminants. It's fast, effective and extremely simple. Plus, it's so simple to use that even an inexperienced user can achieve tremendous results immediately. Dispense-and-Vac is a practical, cost-effective gateway into automated hygienic cleaning systems. Click here to see it in action.

GENERAL TERMS AND CONDITIONS

1. **Pricing:** Witt Industries reserves the right to price any item at time of shipment. Current price schedules will cancel/supersede all previous price lists. Possession of a price list does not constitute an offer to sell. All prices shown are in U.S. Dollars.
2. **Limited Warranty:** Contact Witt Customer Service.
3. **Standard Carton Policy:** Product must be ordered in full carton quantities.
4. **Special orders:** Orders for merchandise that is specially made may have a minimum order requirement and may be subject to additional charges. Witt Industries reserves the right to over or under ship up to 5% on orders for product that is outside of our standard product line. Orders for merchandise that is specially made are not cancelable after being accepted by Witt and are not subject for return.
5. **Fiberglass products:** All fiberglass products are made to order, and are therefore considered special orders. Accordingly, orders for fiberglass products are not cancelable after being accepted by Witt, and are not subject to return. Fiberglass products are offered in many standard colors. Special finishes and colors are available for an additional charge.
6. **Stadium Series Art Charges:** A one-time charge for artwork and logo creation will be applied. Revisions to the original artwork can incur additional charges. The art charge will be waived on an order of 20 units or more. Art approval is required in writing prior to laser cut manufacturing.
7. **Stadium Series Special Colors:** Non-standard colors or colors that need to be matched may be subject to a minimum order requirement and will be subject to a special paint charge. Paint approval is required in writing prior to manufacturing of merchandise.
8. **Freight Policy**: Orders will be shipped F.O.B. shipping point unless otherwise specified. All special quote items and special order items will be priced F.O.B. shipping point. Policy applies to the 48 contiguous states. For shipments outside the 48 contiguous states, all customs, taxes, duties and shipping charges will be the responsibility of the customer.
9. **Freight terms, damages and shortages:** Unless otherwise specified, all shipments are FOB shipping point. Witt Industries' responsibility for the shipment ends when the products are accepted by the freight carrier. It is the responsibility of the customer to inspect all products upon acceptance of the shipment. The customer must notify Witt of any damage or shortages within ten (10) days from receipt of shipment. Claims for noticeable or hidden damage and shortages must be filed by the customer directly with the carrier. All damages or shortages must be noted on BOL/Delivery Receipt.
10. **Additional Freight Charges:** There will be additional charges for the following circumstances: Notify Before Delivery Charge, Lift Gate Needed, Limited Access Delivery, Residential Delivery and Reconsignment of Shipment. Charges will be depending on carrier used.
11. **Return Merchandise Policy:** A Return Authorization Number is required for all returned merchandise. Merchandise will not be accepted without prior consent. Customer has 30 days from date on invoice to request Return Authorization from Customer Service. Product must be received by Witt within 30 days from date of Return Authorization. Product must be returned in resalable condition. Product must be returned prepaid. Merchandise that is made to order is not subject to return.

Strata-Grit Brush Nylon Impregnated w/46 grit silicon carbide, coarse bristle **(Dark Blue)**
Recommended for Heavy duty stripping/scrubbing unfinished concrete

All pad holders require pads. Minuteman does not provide pads.
Refer to the chart below to match the color of the pad to the desired performance.

Scrub-Grit *A Nylon filament with silicon carbide grit for more aggressive scrubbing of floors and grout.*
Great for medium and deep scrubbing of resilient floors, terrazzo, quarry tile and concrete brick.
Recommended by manufacturers for effectively cleaning non-slip floors.

Pad Color	Used For
Synthetic Neutral	Polishing; optimum performance when used on a burnisher of 2000 rpm's or greater.
Black	Stripping and thorough scrubbing; the most aggressive of pads.
Green	Scrubbing and general cleaning on a conventional floor machine.
Tan	Polishing or spray-buffing; for use with burnisher - not to exceed 1500 rpm's.
White	Polishing, most appropriate with a conventional floor machine up to 300 rpm's.
Red	Spray buffing; used only with a floor machine up to 1000 rpm's.
Blue	Scrubbing and general cleaning on a conventional floor machine.

All pad holders require pads. Minuteman does not provide pads.

Refer to the chart below to match the color of the pad to the desired performance.

Pad Color Used For:

Synthetic Neutral - Polishing; optimum performance when used on a burnisher of 2000 rpm's or greater.
Black - Stripping and thorough scrubbing; the most aggressive of pads.
Green - Scrubbing and general cleaning on a conventional floor machine.
Tan - Polishing or spray-buffing; for use with burnisher - not to exceed 1500 rpm's.
White - Polishing, most appropriate with a conventional floor machine up to 300 rpm's.
Red - Spray buffing; used only with a floor machine up to 1000 rpm's.
Blue - Scrubbing and general cleaning on a conventional floor machine.

Critical Filter Vacuums

Minuteman offers many sizes and configurations of Critical Filter Vacuum Systems for safely trapping and containing asbestos, lead, mold, mercury, nuclear waste, and other potentially hazardous materials. Minuteman Critical Filter Vacuums are the safest and most reliable way to collect contaminants. Each model contains multiple stages of filtration up to 99.999%, efficient at .12 microns. Filters are tested in accordance with IEST-RP-CC007 standards. Vacuums are approved for use in Class I (ISO3) clean rooms, electronic assembly areas, laboratories, nuclear power plants, hospitals or wherever there is a need to contain hazardous material and prevent its escape into the environment. Almost any size—from 6 to 55 gallons—and any configuration —wet, dry or both—can be adapted to your particular need. Options include: stainless steel, electro-static painted steel or polyethylene tanks, manometer, and 95 to 200 C.F.M airflow. A wide variety of 1-1/4, 1-1/2, 2, and 3 inch tools and attachments are available for every application.

X829/X839 SERIES VACUUMS

The X829/X839 Vacuums conform to all EPA and OSHA guidelines and requirements for cleaning asbestos and other hazardous materials and filtering all toxic and noxious dust. The X829/X839 Vacuums (15 gallon) contains 5 filter media for dry recovery and 4 filter media when used for wet recovery: disposable paper bag filter (15 gallon dry recovery only) for bulk debris, paper filter protector, cloth filter, impact filter, and U.L.P.A. filter. Six mil plastic drum liners may be used in the 55 gallon models to safely contain large volume pickups. Although specifically designed for asbestos particles, this vacuum is also effective in filtering other airborne pollutants such as: Cement, foundry and kiln dusts, insecticides, fertilizer dust, coal dust, and many others. With an efficiency rating of 99.999% for particles 0.12 microns, the X829/X839 Vacuums are particularly useful for clean-up after insulation operations on pipes, in removing asbestos-covered ceiling and wall material, and for vehicle maintenance procedures involving brakes, clutches, and other asbestos containing materials.

X250-TP SERIES VACUUM

Twin 2.3 HP motors available in 55 gallon drums; offers exceptionally high airflow for fast and effective recovery of a variety of non-flammable wet and dry materials. Uses 1 1/2", 2" and 3" hose. Tool kits available.

X-1000 SERIES VACUUM

Three-stage, 2.0 HP, by-pass motor and 4-stage filtering system purify all vacuum and motor-cooling air of carbon dust and copper particles. Motor-cooling air recirculation device assures that all air going through the vacuum has been H.E.P.A. filtered (99.97% efficient at 0.3 microns) before it is exhausted back into the environment. All motor-cooling air is exhausted without turbulence. Low noise level makes these vacuums ideally suited for dry-only use in class 1,000 to 100,000 white rooms, clean rooms, laboratories and pharmaceutical and biological research labs. Available in 15 gallon tank sizes. May be converted to wet pickup by using optional water shut-off module and 1:1 adapter. (MX Series)

X-839 SERIES 6 GALLON

To recover small quantities in tight places, the 6 gallon vacuums are lightweight and portable. The X-839 features a heavy-duty, 1-1/4 HP by-pass motor, U.L.P.A. filter, impact filter, cloth filter, and paper filter protector. A disposable collector bag is also standard on the 6 gallon unit. Handle and 16-3, 50 foot power cord standard. Wheel bracket assembly optional. Fits 1 1/4" and 1 1/2" tools

Clean Room Vacuum "CRV"

Specially designed to reduce the incidence of airborne dust, including carbon dust from motor-cooling air; for use in Class 1 through 100,000 clean rooms, laboratories, and research labs. The CRV contains three filtering stages and is equipped with an indicator light to signal when the disposable paper collector bag should be replaced. Low noise level of 65 dba allows for quiet operations. Equipped with an U.L.P.A. filter which is 99.999% efficient at 0.12 microns.

MERCURY RECOVERY VACUUM SYSTEMS "MRS"

This specially adapted critical filter vacuum recovers elemental mercury, mercury contaminated particulate and liquid material. MRS Vacuums feature charcoal filters for eliminating toxic mercury vapors during the clean-up process.
The modular four unit system allows user tailoring to fit any particular need.
The MRS 3 is used for picking up liquid mercury using a separator jar and U.L.P.A. filter for filtering out particulate matter, and the activated charcoal filter for the filtration of particulate mercury vapor.
The MRS 4 is excellent for the recovery of mercury contaminated water or oil with an automatic water shut-off and charcoal filter to automatic water shut-off and charcoal filter to trap toxic mercury vapors. The MRS6 Maxi-Guard is a compact, easy-to-handle,
The MRS 6 is a compact, easy-to-handle, vacuum system which effectively cleans and decontaminates confined areas
Excellent for emergency mercury clean-up. System includes a charcoal filter and paper filter collector bag.
U.L.P.A. filter is 99.999% efficient at 0.12 microns.

EXPLOSION PROOF/IGNITION PROOF VACUUM

This Minuteman Hazardous-duty, wet/dry critical filter vacuum is rated explosion proof and dust ignition proof for Class I, Group D - atmospheres containing acetone, benzene, ethane, ethanol, methane, etc. and for Class II, Group G - atmospheres containing flour, starch, corn or grain dust. The 3-filter system features a cloth filter, high density impact filter and the U.L.P.A. filter, efficient to a minimum of 99.999% at 0.12 microns. Fifteen gallon stainless steel tank and 115V, 1.7 HP (peak) motor are standard. Two explosion proof//ignition proof tool kits including 1-1/2" hose and attachments are available for dry only and wet/dry use.

BIO-HAZ VACUUM

The Minuteman Bio-Haz Vac was specifically designed for the remediation of hazardous molds, spores, bio-hazardous dust and viral particulate containment. An U.L.P.A. filter provides 99.999% efficiency at 0.12 microns. Avail with 6gal or 15gal. polyethylene tanks.

BACK PACK VACUUM - V10115PP

This back pack vacuum with H.E.P.A Filtration is lightweight and portable, ergonomically designed to reduce operator fatigue. Equiped with three-filter media, including a H.E.P.A. filter, it provides 99.97% efficiency at .3 microns

General Description about X-829 Vacuum Series

- Economical hazardous material removal vacuum with a self-sealing intake insures a positive vacuum seal
- Non-woven, polyester filter bag provides 50% more filtration area than standard bags.
- Cable, 50 ft.(15m), 16-3
- CFM, 95(2.7m3/min) for 6 gallon units. CFM, 110(3.1m3) for 15 gallon units.
- Water lift, 85" (2159 mm) for 6 gallon units. Water lift, 105" (2670 mm) for 15 gallon units.
- 99.999% efficient at 0.12 microns with U.L.P.A. filter

Critical Filter Vacuums

General Description of X250 Crtitical Filter, Dual Electric Motor Vacuum Series

- For higher volume hazardous material recovery
- 200 CFM (5.664 m^3/min)
- 2 x 2 HP motors
- Available as dry and wet/dry units
- Dry unit allows for safe recovery of most dry, hazardous dusts and nontoxic fine powders
- Wet unit allows for recovery of contaminated water and other liquids
- Wet application results in smaller overall volume pickup ability
- 99.97% efficient at 0.3 microns with H.E.P.A. filter

Critical Filter Vacuums

General Description about Mercury Recovery Vacuum Systems

- Specially adapted critical filter vacuum systems for the recovery of elemental mercury and mercury contaminated particulates and liquid materials.
- Modular 4 element system allows user tailoring to fit any application.
- The MRS Series features a charcoal filter for eliminating toxic vapors during the clean-up process.
- Static lift - 110"(2794 mm), CFM - 115 cu. ft. (3.25m3)min, 1480 watts
- Electric Cable - 16-3/50 ft. (15m)
- Wheels - front wheels 3"(8 cm), rear wheels 8" (20 cm)
- MRS-3 is 99.999% efficient at 0.12 microns with U.L.P.A. filter.

705 Series Air Vacuums

Series 705 Air Operated Vacuums - Commercial and Industrial

705 Series offers a complete line of compressed air powered high lift, high flow heavy-duty vacuums.
The 705 Series is designed for use under all kinds of industrial and commercial applications.
Convenient and easy to use anywhere you may have an air line of proper size. All vacuums are equipped with quick-disconnect fittings and an input air pressure control valve. An air pressure regulator for complete control of input air is available for any of the series; this regulator will pay for itself in a short time through reduced air consumption.
Outside of normal filter changing/cleaning and the cleaning of the tanks the vacuums need no maintenance . since they use no moving parts
All vacuums in the 705 Series are equipped with silencers for reduced noise levels (mid. 80 db. avg.)
The 6 and 15 gallon sizes are available with either a **stainless steel** or electrostatically applied **painted** tank.
Any of the 705 Series may be used in hazardous areas where non-sparking equipment must be used.
When ever a vacuum is used for this purpose you must use grounded hoses, tools and attachments to remove any s tatic electricity that builds up when material is moving through the system (consult Minuteman International for proper application).
There is a size for your application; from a small, lightweight 6 gallon bench-vac up to the super heavy-duty 55 gallon lid assemblies.

The 705 Series is available in 1, 2 and 4 venturi jet units to cover any possible vacuuming need you may have.
You may use the 705 Series for moving most any type of material wet or dry (wet pickup requires that the vacuum be equipped with a water shutoff).
Your 705 Series air vac will move any of the following material with ease, but keep in mind that you are not limited to these materials:
Dry - sand and gravel, metal machining chips, plastic powders and pellets, flux, grains, cement dust, sawdust and wood chips, fly ash and soot, powdered milk, and steel shot.
Wet - water, oil, grease, coolants and chemicals.
Clean heat treating tanks, wash tanks, flooded areas, walls, floors, pipes, fixtures, and all other types of in-plant cleaning on and around machines.
The 55 gallon sized units are equipped with water shutoffs and are ideal for sumping large quantities of water such as after flooding where electric powered units would be unsafe.
The smaller 6 gallon units make ideal bench-top vacuums, and also find use as very portable vacuum sources for big cleaning jobs when used in conjunction with 55 gallon drums and transfer lids.
The 15 gallon size is perfect for on-line cleaning during and after machining operations. It picks up liquids and dry material or any combination with equal ease.

705 Series Air Vacuums

General Description about 705 Vacuum Series
- Compressed, air-powered vacuums with exceptionally high static lift and CFM for recovering solid or liquid materials
- No motors, cords or moving parts mean continuous service without costly and inconvenient maintenance
- Each model is equipped with a silencer which reduces noise levels to a minimum
- Ideal for areas where electricity is not available
